

PETRUCCO'S QUALITY AND ENVIRONMENTAL MANAGEMENT POLICY

PETRUCCO, is a company dedicated to the Box Jacking technology, where concrete reinforced underpasses are pushed under railways and highways. As well, the company is dedicated to the temporary rail bridges, structures design and rail bridges maintenance. It's main target is to improve the quality in:

- ✓ Customer service quality
- ✓ Service delivery quality

Mission

Completion of underpasses under active rail traffic or road traffic, minimizing with its technology time and overall traffic impact, either in rail or/and road infrastructures.

Vision

Accuracy in time schedule provided, safer workplace and control during operations, remarkable decrease of overall project cost and rail traffic impact in comparison with the other methodologies.

Values

Induce personnel self-motivation and career development opportunities.

Innovation in continuous improvement such as Petrucco's self-developed & patented Verona System.

Furthermore, in PETRUCCO we are conscious about searching economic goals achievement by respecting always the environment. In consequence we establish the following principles:

- Compliance of regulations, normative and technical specifications, as well as any other guidance or recommendation, either internal or external.
- Activities and general management aligned with client's expectations and satisfaction.
- Ensure quality, environmental requirements and client satisfaction during any activity.
- Inducing personnel autonomy and proactivity in order to achieve the mentioned goals in an efficient way meanwhile minimizing the environmental impact, specially the urban and hazardous waste.
- Keeping a self-improvement atmosphere in all related activities with client's service and environmental policies.
- Defined orientation to improve company assets and resources optimization.
- All employees are responsible for the environment protection and take environmental inductions by PETRUCCO in order to be updated and conscious about our Environmental Management System.
- Compliance of regulations and normative from UNE-EN-ISO 9001 y UNE-EN-ISO 14001.
